5 Steps to Create Supply Chain Resilience

*BruceAI

Global disruptions—from pandemics to geopolitical conflicts—have shown that efficient supply chain management is no longer an option for SMBs. The good news? You don't need a massive budget or a huge team to get started. By taking small, intentional steps, your business can strengthen operations and stay competitive—starting today.

Step 1

Map the Current State of Your Supply Chain

- ☐ Document suppliers, SKUs, production batches, ordering processes, and data sources.
- ☐ Identify top priorities for improvement

Step 2

Assign a Point-Person

Name:

.....
.....

Step 3

Clean and Standardize Your Data

- ☐ Standardize SKUs, units of measurement, supplier names, and batch identifiers.
- ☐ Digitize records for easier tracking and analysis.

Step 4

Select Purpose-Built Technology

- ☐ Research tools designed for your industry.
- ☐ Look for features like real-time dashboards, supplier portals, and traceability.
- ☐ Prioritize simplicity—technology should reduce, not add, complexity.

Step 5

Measure Success and Iterate

- ☐ Track performance to identify inefficiencies.
- ☐ Use insights to continuously improve processes.
- ☐ Encourage feedback.
